# THEN & NOW

Since the first release of LMR in 1993, the product line has grown from a single cable to include a variety of cables, connectors, and toolkits.

## The Kink Is Dead.

Working with corrugated cable can be a royal pain. It kinks. It's not flexible. It can cost you time and money.

LMR Coaxial Cable won't kink. So, your system installs much easier, and you'll save money. You'll get the optimum performance you expect, with comparable loss.

You'll find it in a size just right for your next installation. Call:
